Objective   To obtain a position as a software developer

Skills   Certifications:

- Android ATC: o   Android App Developer
- Microsoft:

    o MTA for HTML5 Application Fundamentals

    o MTA for Database Management

    o MTA for Software Fundamentals

Skills:

- Android App Development in Java
- HTML and CSS
- C#
- Windows Form Applications
- Access and SQL
- Excel
- VB

Experience   Three apps in the Google Play Store:

- QuickText: This is a simple app for sending texts that also maintains a file of common texts that you can select and not have to type the whole text.

- TextMeeting: This app lets you call a meeting through texts. Also, when a user receives a TextMeeting text, the app can send the meeting information to the default calendar app.

- NumbersGame: This is a simple game where you click the numbers in order as fast as you can. It has a working banner ad.

Github Projects:

- TextEditor: created according to the spec included in the project.

- Connect4: a simple game against the computer with rudimentary AI.
